### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3652

1. Applicant's election without traverse of Group I, claims 1-8, in the reply filed on 6/13/05 is acknowledged.

2. Claims 9-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim.

3. Although the informal drawings are acceptable for examination purposes, applicant is encouraged to file formal drawings at the earliest convenience.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear if the recitation of "the arm" refers to the "extendable arm" or the "arm unit".

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3652

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Hansl (US 6,923,612).

Hansl shows a storage system comprising racks 17 on opposite sides of "robot" 10 having a base on which is mounted an extendable arm unit 15 for placing and removing items into either rack by moving linearly in opposite directions. The arm unit includes multiple stages, as shown in figure 2, for increased reach and compact retraction. The arm unit is driven by a drive mechanism 36, which may include a single drive or multiple drives 39, as noted in col. 7, lines 40+. As seen in figures 1 and 2, the items are held by at least one of the top, bottom, and sides thereof.

8. Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fukushima et al (US 6,224,313).

9. Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yagi et al (US 5,927,926).

Art Unit: 3652

10. Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dang (US 5,362,192).

11. Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Zur (US 4,856,956).

12. Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kinney (US 4,756,657).

13. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

14. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over any of Fukushima et al, Yagi et al, Dang, Zur, or Kinney in view of Rothlisberger et al (US 5,213,463).

The base references all show a single drive motor.

Rothlisberger et al show a similar apparatus, one embodiment (figures 1-12) of which utilizes a single motor 19 and another embodiment (figures 13-23) of which shows motors 49 and 52.

It would have been obvious for one of ordinary skill in the art at the time of the invention to have modified any of the base references by replacing the single drive motor with multiple motors, as suggested by Rothlisberger et al, as this would simply be an art recognized alternate equivalent design expediency.

15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
